

RMB-32ZBS ZigBee Repeater Router with Pass-Through Outlet

RMB-32ZBS is a multi-functional ZigBee repeater router with pass-through outlet that helps saving space. As a wireless extender, RMB-32ZBS has a compact design and connects directly to wall sockets or power strips for a clutter-free installation. Plus, with the backup battery, the RMB-32-ZBS will continue to work even when the power goes out.

Ideal for both residential and commercial premises, the RMB-32ZBS increases the communication range between sensors and the control unit, thereby solving the problem of signal loss due to distance limitations. Multiple routers can help to extend the ZigBee network to eliminate signal dead zones and ensure reliable signal coverage. Extend the reach of your ZigBee Network with the multi-functional RMB-32ZBS.

- Space-saving design with pass-through outlet
- Extends ZigBee Network into Hard-to-Reach Areas
- Multiple regional outlet / plug available
